

Cincinnati Health Department can administer vaccine to anyone who is an Ohio resident, with any of the following conditions:

1. All persons 50 and over
2. Children that are at least 6 months old and younger than 5
3. If you are pregnant
4. Persons over 5 years of age who have high risk medical conditions: chronic pulmonary disorders, including asthma; chronic cardiovascular disorders; chronic metabolic diseases, including diabetes mellitus; renal dysfunction; hemoglobinopathies; and immunodeficiency, including HIV/AIDS and immunodeficiency caused by medications; cognitive or neuromuscular disorders which may compromise respiratory function or increase the risk for aspiration, including seizure disorders.
5. Children and young adults on chronic aspirin therapy, to decrease the risk of Reye's syndrome.
6. Healthy household contacts and caregivers of children under 5 at high risk for severe complications from influenza.
7. Healthy non-pregnant individuals aged 2 to 49 years may receive Live Attenuated Influenza Vaccine (LAIV) intranasal vaccine.

If you are interested in going to one of our health centers, you should call the specific health center for hours of operation and shot times, (as they may change due to staffing levels). Generally, CHD begins vaccinations in October.

Our Senior Flu Program gives flu vaccine to the high-risk groups, numbers 1, 4, 5 and 6 above (no children or pregnant women), who are Ohio residents. People may call the Senior or Community Center contact person to register for a flu shot on their particular day. We do ask for a voluntary donation from those receiving the vaccine, UNLESS they have Medicare. Seniors on Medicare should bring their Medicare card with them.

You can call, (513) 931-SHOT, if you want someone to assist you on where Flu Shots are available in the Greater Cincinnati Area; or you can access the information from the internet at www.931shot.org.

Below is the Information on Senior Flu Program 2007 (Dates/Times/Locations) or Location of Health Care Centers.
